

Create a personal portfolio website using React, Tailwind CSS

1. Ensure responsiveness across various devices (mobile, tablet, desktop).
2. Implement proper coding practices, adhering to React best practices and guidelines.
3. Use dummy data initially; plan to replace it with actual information later.
4. Deploy the website using Netlify or another suitable platform.
5. Mandatory Sections:
 - a. ***About Me***: Include a brief introduction and background.
 - b. ***Work Experience***: List relevant work experience with descriptions, roles, and achievements.
 - c. ***Education***: Provide details of educational qualifications, degrees, and institutions attended.
 - d. ***Projects***: Showcase at least 3 projects with descriptions, technologies used, and links (if available).
 - e. ***Skills***: List relevant skills and technologies, possibly with proficiency levels.
 - f. ***Contact Information***: Provide contact details or a contact form.
 - g. ***Resume/CV***: Provide a downloadable link to a PDF version of their resume or CV.
6. Include a professional design with a clean and modern aesthetic.
7. Implement smooth transitions and animations to enhance user experience.
